February 2014

INTRODUCTION

This publication provides statistical information to planners, educators, and employers regarding high school graduates in Tennessee. The data in High School Graduates 2013 are presented in a county summary table followed by statewide totals. Individual county tables are presented alphabetically.

The Tennessee Department of Labor and Workforce Development, in cooperation with the Tennessee Department of Education, conducts a survey of all schools that have enrollment in grades 9-12 and qualify to give a state of Tennessee diploma upon graduation. This includes all public schools, accredited private schools, and special schools in the state. The following tables list the number of schools and response rates as well as the number of graduates, their education, and current work plans or military service, if appropriate.

Special thanks are extended to school administrators and counselors who took time to answer this survey. Their cooperation will benefit the educators, employers, and planners across the state who use this publication.

HIGHLIGHTS

Tennessee's 2012-2013 graduating class attended the state's 410 public and private high schools. There are 53 city high schools, 270 county high schools, 84 private high schools, and three state special schools that constitute the universe of this survey. The special high schools are for the vision and hearing impaired. This survey includes all accredited high schools that had students who qualified for a state of Tennessee diploma. Of the schools that responded to the survey, 73.9 percent of their graduates plan to continue their education.

Private schools graduated only 8.1 percent of all state graduates but 98.2 percent of these students plan to continue their education. City and county schools graduated the remaining 91.9 percent. Only 71.7 percent of these graduates plan to obtain additional education or training. The four largest urban counties (Davidson, Hamilton, Knox, and Shelby) accounted for 31.2 percent of all Tennessee

graduates. Of the graduates in those four counties, 80.7 percent plan to continue their education. In the remaining 91 counties and the special schools, only 70.8 percent of the graduates plan on continuing their education. The survey response rate, in 2013, for these four urban counties was 73.3 percent. The response rate was 78.2 percent in 2012, 82.1 percent in 2011, and 85.7 percent in 2010. The response rate in the remaining 91 counties increased to 89.8 percent.

The highest percentage of graduates continuing their education occurred in Union County (100.0 percent), Perry County (95.4 percent), Williamson County (90.9 percent), Lincoln County (87.0 percent), and Sevier County (86.6 percent). These numbers are tempered by the fact that four of the six counties had only one high school that reported graduates. Union County, the county with the highest percentage, had one private school with three total graduates. The lowest percentage of graduates continuing their education occurred in Stewart County (25.3 percent), Unicoi County (39.1 percent), White County (39.8 percent), Monroe County (40.7 percent), and Giles County (41.2 percent). This is the third consecutive year that Stewart and Giles counties had some of the lowest percentages of students continuing their education. Henderson and Sequatchie counties had no responses to this survey.

An 83.9 percent response rate (344 schools) was achieved in this year's high school survey. This was the same number schools responding as the previous year. The universe increased by two schools. The figures are not absolute measures; they represent the **intentions** of the 2012-2013 graduates. All data in this publication are **preliminary** accounts.

Graduates who did not fit into the categories of continuing their education, entering the labor force, or entering the armed forces were listed in the category of "other." These categories may not add to total graduates when students are in more than one category (i.e., continuing education and entering the labor force).

NA represents "not applicable" and is used when we did not receive any survey responses for a particular county. Schools that responded to the survey but had no graduates will have zeroes in the data column but will be counted as a responding institution.
